

I claim:

1. A fan assembly comprising:
 - 2 a fan; and
 - 3 a housing for the fan, the housing having an inner face towards which the fan
 - 4 is oriented to blow air, wherein the inner face has an inward concave
 - 5 shape so that a central portion of the inner face is nearer to the fan
 - 6 than an outer portion of the inner face.
- 1 2. The fan assembly of claim 1, wherein the fan assembly is attached to a
- 3 chassis of a computer, the chassis having one or more openings at least partially aligned
- 4 with one or more openings in the inner face of the housing, thereby allowing air to flow
- 5 through the chassis during operation of the fan.
- 1 3. The fan assembly of claim 2, wherein the chassis forms at least a portion
- 2 of the housing.
- 1 4. The fan assembly of claim 2, wherein chassis has a concave architecture
- 2 to match the inner face of the housing.
